AMENDMENT AND RESPONSE

Assistant Commissioner for Patents Washington, D.C. 20231

FEB 16 2000 ECK ULITER 2700

REMARKS

Applicant has carefully reviewed and considered the Office Action mailed November 9, 1999, and the references cited therewith.

Applicant respectfully requests reconsideration of the above-identified patent application as amended in view of the following remarks.

Rejections Under 35 U.S.C. § 103

Claims 1-5, 7, 8, and 10-18

Claims 1-5, 7, 8, and 10-18 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Broussard et al. (EP Patent No. 0 602 947) in view of Gregg et al. (U.S. Patent No. 5,963,195). Applicant respectfully traverses this rejection.

Claim 1 recites, in part, "a pointing device operatively coupled to the computer and having at least one control to control the multimedia device." Claim 8 recites, in part, "a pointing device having at least one control to control the multimedia device such that actuation of a control causes the computer to change a functionality associated with the control." Claim 12 recites, in part, "a component disposed within the housing to signal directional movement to the computer; and, at least one control disposed within the housing to control the multimedia device." Claim 16 recites, "A pointing device for a computer operatively coupled to a multimedia device comprising at least one control to control the multimedia device."

Applicant has carefully reviewed the cited reference and is unable to locate a teaching or suggestion to use a pointing device to directly control a multimedia device as recited. The Broussard et al. reference does not use a pointer device to directly control a multimedia device.

Instead, the reference uses a pointer device in conjunction with an application program to control
